

MUTCD RETROREFLECTIVITY

Are YOU Ready?

Description – Has your Agency established and implemented a sign maintenance program that regularly addresses the new Manual on Uniform Traffic Control Devices (MUTCD) minimum sign reflectivity requirements? Agencies have until June 12, 2014 to implement and continue to use an assessment or management method that is designed to maintain regulatory and warning sign retroreflectivity at or above the minimum levels in Table 2A-3 of the 2009 MUTCD.

To help Mississippi cities and counties meet these requirements, we've launched a **free Retroreflectometer Loan Program** that provides Mississippi local agencies with free access to a measuring device that plays an important role in ensuring quality and accuracy when implementing a roadway sign management program.

Traffic signs provide important information to road users. To be effective, traffic sign visibility must be maintained during daytime and nighttime conditions. In addition to Section 2A.08, the MUTCD addresses sign visibility in several other places, including Sections 1A.03, 1A.04, 1A.05, 2A.06, 2A.07, and 2A.22. These sections address factors such as uniformity, design, placement, operation, and maintenance. **Registration fee is \$25 per person. Lunch is "on your own".**

Who Should Attend? This training is designed for road supervisors, road managers, public works directors, foreman, superintendents, MPOs, engineers, crew leaders to perform sign retroreflectivity inspection using the approved methods by the FHWA.

Instructor: Mr. Scott Burge, CMPDD

Time: 8:00 a.m. – 12:00 p.m.

Registration Form (Please Print or Type)

Agency or District Name: _____

Address: _____

City: _____ State: _____ Zip: _____
